

REMARKS

Applicant's Reply
to the Rejections

In the aforementioned reply to Office Action dated July 6, 2006, claim 40 claimed, "using a portion of the first current to bias the RESET transistor at an operational point lower than a first threshold." Applicant has corrected the claim to read "lower than a [[first]] second threshold." Applicant believes this is a correction of an informality and, therefore, the amendment should be entered as a matter of right.

The foregoing demonstrates that claims 40-44, as amended, are allowable. This application is therefore in condition for allowance. Reconsideration and allowance are accordingly respectfully requested.

Respectfully submitted,

A handwritten signature in black ink, appearing to read "Joel Weiss", is written over a horizontal line.
